## Notice Regarding Technical Center Box Issue Fee Mailings

The Office will begin mailing address labels with the PTOL-85, "Notice of Allowance and Issue Fee Due" for patent applications allowed in all Technology Centers. These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

## Change to "Issue Notification" Procedure

The "Issue Notification" informs applicants of the patent number and issue date that has been assigned to a utility, design, plant, or reissue application. The "Issue Notification" is now being mailed about **10 days** before an application issues as a patent.

The process of printing patents has recently been changed so that patents are printed more efficiently with patents being issued four weeks after payment of the issue fee and compliance with all formal requiremenys. *See Patents to Issue More Quickly After Issue Fee Payment,* 1220 Off Gaz. Pat. Office 42 (March 9, 1999) and *Filing of Continuing Applications, Amendments, or Petitions after Payment of Issue Fee,* 1221 Off. Gaz. Pat. Office 14 (April 6, 1999). In the past, the patent number and issue date were assigned before the process of electronic capture of the information to be printed as a patent began. If, during the electronic capture process, illegible text, undecided petitions, unentered amendments or the patent application was otherwise not ready to be printed as a patent, a printer query would be generated. Since printer queries could not always be resolved before the originally scheduled issue date, the applications had to be removed from the originally scheduled issue, and assigned another patent number and issue date once the query had been resolved. This process of assigning a new patent number and issue date was inefficient.

Under the new shortened publication process, however, electronic capture of the information to be printed in a patent begins as soon as an allowed application is received in Office of Patent Publication, which is well before the issue fee is paid. As a result, when the issue fee is paid and processed by the Patent and Trademark Office (PTO), electronic capture of the data to print the application as a patent should have been completed and any queries addressed. Thus, under the new process, the

patent number and issue date are assigned to the application approximately two weeks prior to the issue date, with the notification being mailed a few days later. The instances of an "Issue Notification" being mailed and a patent not issuing on the scheduled issue date should be extremely rare.

As a result of the new process, the PTO will be unable to grant a request for an earlier assignment of a patent number and issue date or to inform applicants of the patent number earlier than the mailing of the "Issue Notification".

If there are any questions or comments about this change in practice, they should be forwarded to Brian Johnson, Supervisory Patent Examiner, Systems and Contracts Division, Office of Patent Publication, by facsimile at (703) 305-4372, by telephone at (703) 305-0899, or by e-mail at brianl.johnson@uspto.gov or Karna Cooper, Paralegal Specialist, Office of Patent Publication, by facsimile at (703) 305-4372, by telephone at (703) 305-5254, or by e-mail at karna.cooper@uspto.gov.

**Notice to the Public**
**Regarding the 1999 Concurrent Search Pilot Program**

The United States Patent and Trademark Office (USPTO), the European Patent Office (EPO) and the Japanese Patent Office (JPO) (the Trilateral Offices) have participated in prior search exchange studies whereby the examiners of the three Offices performed concurrent searches on a limited number of selected applications. The results of the prior studies show that the quality of search improves when examiners of the three Offices were able to confer with each other regarding search strategies and fields of search prior to performing the search and then confer again to discuss and share the search results.

At the Sixteenth Trilateral Conference held in Miami, Florida, on November of 1998, the Trilateral Offices agreed to participate in a new concurrent search pilot program. This new program will involve national/regional applications in all fields of technology, and focus on first actions on the merits. The Trilateral Offices agreed to exclude PCT international applications from the pilot program. The emphasis of the pilot will be to promote: (1) greater mutual understanding and further technical cooperation among the Trilateral Offices; (2) increased sharing of information among examiners in the Trilateral Offices; and (3) enhanced knowledge transfer with respect to both working methods and search tools. The new pilot program will include collaboration of examiners of the Trilateral Offices prior to performing the search and the sharing of search results prior to the preparation of the Office action/search report.

The Trilateral Offices have agreed to limit the number of applications for the new pilot program to 200 applications. If the limit is reached by October 1, 1999, the Trilateral Offices will evaluate the program to determine whether the program should be expanded to include more applications.

This pilot program will be initiated upon applicant's request. In order to be eligible to participate in this pilot program, the following conditions must be met:

(1) A national/regional application (PCT applications are excluded) must be first filed in the EPO, or the JPO or the USPTO;

(2) Corresponding applications must be filed in the remaining two Trilateral Offices;

(3) The claims in the first filed application and the corresponding applications must be drawn to the same invention. Applicant is required to submit a set of claims, in the English language, for concurrent search along with a claims correspondence table to each Trilateral Office no later than the expiration of three months from the filing date of the last corresponding application. The claims correspondence table must indicate how each claim in the set of claims for concurrent search corresponds to the claims filed in each of the three applications;

(4) No first Office action on the merits/search report has been issued on the application by any of the Trilateral Offices;

(5) Applicant must file a request/petition for participation in the concurrent search pilot program in each of the Trilateral Offices where the national/regional application was filed. The request/petition will permit an Office to take the application out of turn or defer action until the application is ready for concurrent search;

(6) For the USPTO, the request/petition will be treated as either a petition to make an application special under 37 CFR 1.102, requesting that the application be taken out of turn, or if appropriate, as a petition to temporarily suspend action under 37 CFR 1.103, requesting that action be deferred until the application is ready for concurrent search under this pilot program. The request/petition must be accompanied by the required petition fee (37 CFR 1.17(i)). The request/petition must also include an authorization for the USPTO to communicate with the other two Trilateral Offices concerning any subject matter of the U.S. application;

(7) The request/petition filed in each Trilateral Office must include the application numbers and filing dates of the corresponding applications (if known) filed in the other Trilateral Offices. If the application numbers and filing dates of the corresponding applications are not known at the time of filing of a request/petition in a Trilateral Office, applicant must submit such information to the Trilateral Office when the information becomes available.

Sample request/petition forms, sample set of claims for concurrent search and sample claims correspondence table form will be available on the Trilateral Website (http://www.uspto.gov/web/tws/index.html). The Trilateral Website can be accessed through the homepage of any one of the Trilateral Offices.

Upon receipt of the request/petition, each Trilateral Office will notify the other Trilateral Offices that a request/petition has been filed. If upon review of the request/petition by the Trilateral Offices it is determined by the Trilateral Offices that the first filed application and the corresponding applications are <u>not</u> eligible for participation in the pilot program, e.g., a first office action on the merits/search report has been issued by one of the Trilateral Offices or the claims in the three applications are not drawn to the same invention (if any one of the Trilateral Offices determines that there is lack of unity of invention or a requirement for restriction is appropriate), applicant will be so notified by each of the Trilateral Offices. The refusal to accept applicant's request/petition will <u>not</u> entitle applicant to a request for a refund of the petition fee paid to the USPTO (see 37 CFR 1.26). Furthermore, the decision by the Trilateral Offices to refuse acceptance of applicant's request/petition will not be subject to appeal or reconsideration.

When the corresponding applications filed in the Trilateral Offices are ready for search, e.g., application is complete and all formality checks have been performed, a concurrent search of the application will be performed. Applicant will be notified by each of the Trilateral Offices that the request/petition for participation in the concurrent search pilot program has been accepted. Examiners of the Trilateral Offices will have a first consultation with each other prior to performing the search to discuss the search strategies and fields of search as well as search tools and other electronic data bases to be used. Examiners will confer by electronic media such as fax, telephone, or Trilateral Network. Examiners of the three Offices will perform a comprehensive search based on the normal working methods of each Trilateral Office. Examiners will have a final consultation with each other after performing the search to discuss and share the search results prior to the preparation of the office action/search report.

Each Trilateral Office will prepare an Office action/search report based on its own national/regional law.

The pilot program will be evaluated by the Trilateral Offices prior to the June 2000 Trilateral conference to determine whether the pilot program should be modified or expanded.

Request/petition for participation in the concurrent search pilot program filed in the USPTO should be addressed to the attention of Magdalen Greenlief, U.S. Patent and Trademark Office, Office of the Deputy Assistant Commissioner for Patent Policy and Projects, Crystal Park 2, Suite 910, Washington, D.C. 20231.

## Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI[3]) in Sunnyvale, California.

# MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

# SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

### SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
